Neural Filters in Photoshopp: Expressions Change

Neural Filters

- Smart Portrait Beta Toggle >
- Makeup Transfer Beta Toggle >
- Depth-Aware H... Beta Toggle >
- Colorize Beta Icon >
- Super Zoom Beta Toggle >
- Noise Reduction Info >
- Face Cleanup Info >
- Photo to Sketch Info >
- Sketch to Portrait Info >
- Pencil Artwork Info >
- Face to Caricature Info >

This filter processes image data in the cloud.

Expressions

- ☒ Happiness Slider 11
- ☐ Surprise Slider 0
- ☒ Anger Slider -9

Subject

- ☐ Facial age Slider 0
- ☐ Gaze Slider 0
- ☐ Hair thickness Slider 0
- ☐ Head direction Slider 0
- ☐ Light direction Slider 0

Mask settings

- ☐ Placement Slider 0
- ☒ Feathering Slider 20

Experimental

- ☒ Retain unique details Slider 90

Are you satisfied with the results?

Yes No

Output New Layer

Cancel

OK

# AI Goes Mainstream

## Neural Filters in Photoshop: Expression Change

# Computer Vision

## AutoDraw and Neural Filters

- AutoDraw uses **image recognition**
  - Learned to recognize my whale because it had seen many human-drawn sketches of whales
- Wix ADI uses **predictive models** combined with **natural language processing** and good old fashioned programming
- Photoshop Neural Filters are made possible by StyleGan2 ADA
  - StyleGan2 is a **generative adversarial network (GAN)** made by Nvidia
  - As the name suggests, StyleGan2 is good for manipulating image styles
